General Comment:

Date of Inspection: 12-03-16

Type of Inspection: Fracing, Containment, Stormwater

Location Name: Piccoli A 4 Well Pad;

Location ID # 311986

OGCC observed site preparation for re-perf and re-frac of the PICCOLI A 4 Well on 12-03-16 and workover on 12-05-16;

Halliburton prepared site on 12-02-16 and 12-03-16 with a perimeter berm and spill control equipment; 12" to 15" earthen berm placed around well pad perimeter for containment of temporary frac tanks; straw and straw waddles placed beyond berms for surface soil erosion control;

Location is within a designated setback location; no evidence of fugitive dust or odors reaching nearby residence during fracing operations; noise levels were mitigated due to dense vegetation between well pad and residence, no other sound controls needed;

Existing stormwater controls indicate no offsite migration of fluids or sediment.
