General Comment:

This inspection is in response to a bond release request from Petroglyph Operating. This pit remains open in COGCC records. This inspection is to document status of pit closure.

In person inspection of pit facility is not possible due to washout of County Road 343 and massive flooding.

An administrative review of aerial photos show that this pit existed and was used by landowner prior being permitted for CBM use. Based upon administrative review the pit facility has been returned to landowner use. Pit facility has subsequently been closed in COGCC database.
