General Comment:

Date of Inspection: 05-26-16

Type of Inspection: Drilling, Containment, Stormwater (Joint Inspection with FIU SW Supervisor)

Location Name: Elsa 34-6-19 Pad;

Location ID #: 440174

Construction stormwater BMPs for well pad (perimeter berm, diversion trenches, silt fences, straw wattles, rock check dams, and other spill stormwater control equipment) and access road (borrow ditch with rock check dams for sediment control) are in-place and these stormwater controls indicate no offsite migration of fluids or sediment.

Existing stormwater controls indicate no offsite migration of fluids or sediment to nearby irrigation ditch.

Observed drilling operations of well Elsa 34-6-19 #2, API 05-067-09945; drilling operations conducted in accordance with Form 2A COAs; drilling tanks had 1- to 2-foot engineered wooden covered with poly containment berms.

Operator had spill/release tarps beneath rig, tanks, and other containers and pallets.
