<b>Is it happening right now?</b>	
<b>Detailed description of the issue or issues.</b>	<p>,Strong gas smelling odor again this evening. This is on its way to becoming a nuisance. I'm glad it has been crummy weather the last few days since this began, since my kids have been inside and our windows have been closed. I have yet to receive a phone call from the COGCC. This is the exact same issue that occurred at the Wooley Beckey Sosa site in Erie, and it was NEVER resolved. I am getting very frustrated. Section 805. ODORS AND DUST a. General. Oil and gas facilities and equipment shall be operated in such a manner that odors and dust do not constitute a nuisance or hazard to public welfare. The odor is becoming a nuisance. There is no concern for my "right to enjoyment". There were over 50 individual complaints at the WBS site, and far as I can tell the odor issue was never resolved. I suppose the same will happen here. I also understand that you forward odor concerns to the CDPHE due to health concerns with those odors. Well it clearly states in your Seciton 805 that you are responsible to control an odor nuisance. This is a nuisance! Please call me <a href="tel:520-975-7676">520-975-7676</a></p>
