Inspected Facilities:

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
450645	WELL	TA	05/17/2017	OG	103-12287	Rangely Unknown 2	TA

General Comment:

PROW/ODO well. Well is 340' west/upwind of an occupied residence. Wellbore contains liquid - depth unknown - gas/CO/H2S present. Appears to be 5.5" casing - top is mangled/ripped with a piece of cable attached - looks like someone tried to pull it out. Measurable gas present - measured volume-13 gallon trash bag - took 35 seconds to fill, measured with 4gas meter - 100% LEL/95ppm CO/1.5ppm h2S - reading taken in a 15 second test centered above casing. Well is located in a fairly accessible open field - Barb wire fence surrounds field - land owner may allow access via driveway. A plugging bid has been presented to Craig Burger.
