General Comment:

Reclamation Inspection in response to a requested bond release.
Form 4 document number 401276761 was submitted to abandon permit and indicates the location was not constructed.
The location is constructed and does not meet the 1004 final reclamation requirements.

Comment: The location does not meet the 1004 Final Reclamation requirements. The location has been built and has not been recontoured and reclaimed. There are two pits that remain that have not been backfilled and there is torn liner debris that remains. There are erosion issues along the fill slopes and topsoil piles and there are no stormwater controls in place. There are undesirable weeds growing throughout the location and along the topsoil piles. The well does not appear to have been drilled. See Attached Photos

Corrective Action:	Remove all debris that remains. Recontour the location and replace topsoil to original relative position. Decomact soils by cross ripping to a minimum depth of 18 inches. Install stormwater control BMP's in accordance with good engineering practices. Prepare the location for revegetation.	Date	07/03/2017

		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
Seeding of the location will need to be performed at the appropriate season but no later than October 15, 2017 for Fall seeding.	CostaR	06/05/2017
Establish vegetation with total perennial non-invasive plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	06/05/2017
