FIELD INSPECTION FORM

Loc ID 305092 Inspector Name: Maclaren, Joe On-Site Inspection 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

OGCC Operator Number: 10459
Name of Operator: EXTRACTION OIL & GAS LLC
Address: 370 17TH STREET SUITE 5300
City: DENVER State: CO Zip: 80202

Findings:

- 3 Number of Comments
- 0 Number of Corrective Actions
- Corrective Action Response Requested

General Comment:

COGCC Engineering Integrity Inspection performed on June 1st, 2017 in response to initial form 19 spill report Doc #401289680 received on 05/22/2017 that outlines: While conducting routine checks of assigned Extraction locations, the Lease Operator observed that a partially buried produced water vessel had been displaced within the tank battery. It is presumed that the observed condition resulted from the tank "floating" on a higher than normal water table resulting from the recent 25- year storm event in the area. During the investigation, it was determined that the water dump line had been compromised causing an unknown volume of produced water to be discharged into the subsurface. The site was already shut-in in preparation for P&A and final reclamation of the site. The details of observations made during this field inspection are available in the comment section of this report. Photo's uploaded and can be accessed via link(s) at the end of this report.

Comment	User	Date
This location observed shut in at the time of this field inspection. No remediation activities were in progress at the time of this field inspection.	maclarej	06/05/2017
As outlined on supplemental form 19 doc #401290627 received on 5/23/17: In response to the incident, the remaining produced water in the partially buried vessel was removed from the floated tank. The site continues to be shut-in in preparation for P&A and final reclamation. To minimize the potential for similar incidents in the future, Extraction is in the process of removing all partially buried fiberglass tanks, with new partially buried tank installs are constructed of concrete.	maclarej	06/05/2017
