Operator Comment: The above ground riser has been determined to have an operational need to remain in service. The riser will be used as a maintenance and observation point for the Kerr McGee 38-2005-6108-3 gathering line. The riser will be abandoned and any additional disturbance area will be reclaimed in accordance with COGCC 1000 series rules once the operational life of the asset has concluded.

COGCC Decision: Not Approved

COGCC
Representative:

COGCC
Supervisor:

Per the reclamation 1004 a rules all riser that served the well must be removed. Therefore, your request to leave the riser in place must go through a variance process and be approved by the Director. Please see the Reclamation Variance Guidance on the COGCC web site. Please be sure in the variance request to include the right of way information for the surface and show that the pipeline has been registered with the Public Utility Commission.

Please note Kerr McGee must mark and protect the riser sufficiently. The construction fence is not adequate as indicated by at least two inspection photo logs where it was shown that the construction fence was on the ground (recommend a Bull pen since it is out in an open field).

OPERATOR COMMENT AND SUBMITTAL
