**COGCC Comments**

Comment	User	Date
On site at 8:30 am. With borrowed ladder I proceeded with leak check on 3" line. The 3" line runs from the well to the crematorium and is 8 ft above grade. It runs 70 ft from the well to the retort oven. I check for leaks with soapy water along the entire 70 ft. I found no leaks for the 3" line and 1" line. I go into the basement of the funeral parlor and see that the 1" line goes into the boiler and hot water heater. Off site at 12:30 pm.	duranj	06/15/2017
