**General Comment:**This is a stormwater inspection.

**Reclamation - Storm Water - Pit****Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Hydro Mulch	Pass					Temporary BMP

Comment: Operator shall implement long-term stabilization along the previously vegetated areas inside the guy line anchors that were sprayed to manage for weeds. It would be recommended by COGCC staff and the surface owner to stabilize all areas not needed for production with long-term, self sustaining vegetative stabilization. Currently, hydromulch is serving as a temporary stabilization BMP but additional long-term stabilization BMP(s) will need to be implemented. Please refer to the attached inspection photos.

Corrective Action:

Date: \_\_\_\_\_

Pits: ☐ NO SURFACE INDICATION OF PIT

**COGCC Comments**

Comment	User	Date
It should be noted the Operator did seed and hydromulch the areas inside the guy line anchors. However, very little germination was observed which might be affected by the residual chemical weed spray that was used in February 2017.	binschusc	06/19/2017
