

Photo 1: View of the project area from the eastern portion facing center. Revegetation is weedy with an abundance of kochia (*Kochia scoparia*) mixed with desirable species such as western wheatgrass (*Pascopyrum smithii*) and crested wheatgrass (*Agropyron cristatum*).

Photo 2: View of the northeastern portion of the project area from the eastern edge of the working area facing northward.

Photo 3: View of the northern portion of the project area from the eastern edge facing westward.

Photo 4: View of the eastern portion of the project area from the northeastern edge facing southward.

Photo 5: View of access road facing north toward the well pad.

Photo 6: View of the western portion of the project area from the northwestern corner facing southward.

Photo 7: Birdseye view of typical weedy area within the interim reclamation area where vegetation is largely kochia (*Kochia scoparia*).
