Description

1	Drilling/Completion Operations	There is currently only one well planned on the pad at this time. This well will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. This well and all future wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
