VEGETATIVE COVER \_\_\_\_\_

Comment: Crop (corn) vegetation growth over the well and battery locations is stunted when compared to the adjacent reference area. This is likely due to compaction concerns. See attached photo documentation.

Corrective Action: \_\_\_\_\_ Date **09/15/2017**

Perform additional reclamation on in accordance to COGCC 1000 series reclamation requirements and standards. To allow time for Noble to collaborate with the surface owner and determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities or crop production, and to allow time for Noble to identify the issues hindering crop growth, all additional reclamation activities shall completed no later than September 15th, 2017

Well Release on Active Location ☐Multi-Well Location ☐**COGCC Comments**

Comment

User

Date

Based on the inspector's experience, the likely cause of stunted growth occurs when root barriers form from compacted soils, which diminish growth potential.
