TRANSECT RESULTS OF DISTURBED AREA% \_\_\_\_\_

TRANSECT RESULTS OF REFERENCE AREA% \_\_\_\_\_

TOTAL % OF DESIRABLE VEGETATION COVER \_\_\_\_\_

VEGETATIVE COVER \_\_\_\_\_

Comment: **This location does not meet reclamation requirements. Two (2) pipe riser equipment remains on the location. Areas on the northeast end of the location have not been recontoured. Areas where the pit wall had existed remains unvegetated. Pit has a historic remediation, see project #8379 for additional details, pit may require additional remediation efforts. Access road has not been reclaimed; gravel remains and predominantly unvegetated.**

Corrective Action:	Perform reclamation in accordance to COGCC 1000 series reclamation requirements and remove gravel from the road, remove risers, recontour the location and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels on the location and access road. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. To allow for a fall seeded, and time for Noble to determine if additional remediation is required at the pit, revegetation activities shall be complete no later than 11/15/2017.	Date	11/15/2017
