

On August 3, 2017 COGCC Environmental Staff (Alex Fischer) conducted an environmental field inspection of Wexpro Company's (Wexpro) J.C. Donnell #17 Location (Location ID: 313383, API 05-081-07422). The following participated in an onsite for Wexpro's proposed Powder Evaporation pit and tour of their Canyon Creek facility in Wyoming.

Tammy Fredrickson	Dominion Energy Wexpro
Chet Deru	Dominion Energy Wexpro
Jon Lison	Dominion Energy Wexpro
Keith Sauter	BLM
Shawn Wisser	BLM
Janell Cory	BLM
Tim Barrett	BLM
Tracy Perfors	BLM
James Roberts	BLM
Joseph Wright	CDPHE
Jerry Hoberg	Moffat County Planning
Alex Fischer	COGCC

Weather was partially cloudy and temperatures about 70 degrees Fahrenheit.

The following is a summary:

- J.C. Donnell #17 is a former PAed well converted to a UIC well which was SI at the time of inspection. Wexpro stated that this well is no longer viable and proposed to construct an approximate 150,000 bbl evaporation pit at this Location. Currently infrastructure is in place which includes six 400 bbl tanks for slop oil (condensate) separation and produced water. All tanks are in a lined steel bermed secondary containment.
- Wexpro representatives stated that when this Location is active, typically 3-4 trucks per day would services this Facility.
- BLM had concerns regarding the sage grouse at the proposed Location and proposed other possible Locations (Musser 4 and 25) in Sections 4 and 5, T11N, R97W.
