

**Photo 1: View of the project area from the northeastern corner facing center.**

**Photo 2: View of the eastern portion of the project area from the northeastern corner of the well pad facing southward.**

**Photo 3: View of the northern portion of the project area from the northeastern corner facing westward. Edges of working surface are revegetated with grasses such as intermedate wheatgrass (*Thinopyron intermedium*) and squirreltail (*Elymus elymoides*). Erosional rilling is occurring along the northern edge.**

**Photo 4: View of the southern portion of the project area from the southwestern corner facing eastward.**
