General Comment:Date of Inspection: 7-27-17Type of Inspection: Wildlife Consultation, Containment, StormwaterLocation Name: IGW N33N8W 6SESW Pad; IGW 124 and IGW 125 wellsLocation ID #: 311916Form 2A# 401317831API #: 05-067-09298 and 05-067-09349

Construction stormwater BMPs for well pad (diversion trenches, straw wattles, and other spill stormwater control equipment) and access road (borrow ditch for sediment control) are in-place and these stormwater controls indicate no evidence of offsite migration of fluids or sediment; existing stormwater controls indicate no offsite migration of fluids or sediment to nearby ditch and wetlands to the north of the well pad; however, based on the recent onsite and inspection (7-27-17) conducted by COGCC, additional stormwater controls will be required for the existing well pad area and the tank containment area of this oil and gas location; some cut and fill slopes have been partially re-vegetated; no evidence of leaks or spills at wellhead; tank has secondary containment - no evidence of leaks or spills; signage for tank and wellhead are adequate; CPW indicated that deer timing should be adhered to if possible; however, this location has a surface owner waiver of all CPW recommended wildlife BMPs.
