Comment:

Corrective Action:	<p>Inspection Doc. #682501867 required operator to repair or remove wattle BMPs in disrepair on the location, remove cattle guard and perform additional reclamation on unvegetated areas of the location. Wattle BMPs remain in disrepair and are considered debris, cattle guard remains on access road and no evidence that additional reclamation and revegetation activities had been conducted; large bare areas on the southern end of the location remain unvegetated with no sign of desirable perennial vegetative germination or growth/establishment. Original CA and CA date remains in place.</p>	Date 05/31/2017
	<p>Repair or remove and properly dispose straw wattle BMPs currently in disrepair on location. Remove cattle guard. Perform additional reclamation on unvegetated areas of location and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the landowner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 5/31/2017.</p>	
Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
