Comment:

Previous inspection doc. #682500674 required operator to remove trash debris, contact Northeast Environmental Protections Specialist regarding remediation and reclaim the site. Trash debris has been removed, form 27 submitted (see project #9674). Reclamation work does appear to have been conducted, however desirable perennial vegetative growth in the areas large bare previously identified (see doc #682500674) does not appear to be establishing. Continue to monitor location and conduct work as needed. See "COGCC Comments" for additional comments.

Date

Soil concerns may still exist and additional remediation efforts still may be required if reclamation does not progress. A follow-up inspection will be conducted during the next growing season, if it is determined that reclamation is not progressing, additional corrective actions may be required to bring location back into compliance.
