General Comment:

inspected in response to CDPHE email regarding potential spill/release of E&P waste in area. CDPHE report 2017-0405 regarding ponded water. Ponding of surface water was observed to be as a result of 2 earthen dams created by utility contractors across the drainage ditch paralleling WCR 20.5 and not as a result of active or ongoing releases of E&P wastes. See attached photos of ponded surface water and causes. Anadarko representative was also present during part of the inspection along WCR 20.5.
