TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: There is a perimeter fence around the location which appears to be maintained. The desirable vegetation cover at the location has not adequately established and there is predominantly undesirable weeds such as Kochia and Horseweed. The undesirable weeds are over 3.5 feet tall in areas and appear to be impeding desirable vegetation establishment and will become a debris source once it dies off this fall. Additional reseeding and weed control is needed to facilitate the establishment of desirable vegetation. See Attached Photos

Corrective Action:	Comply with Rule 1004. Control undesirable weeds and remove debris. Reseed areas of the location to facilitate desirable vegetation establishment.	Date	11/15/2017
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
The fence around the location will need to be removed once vegetation has adequately re-established in order to pass a final reclamation inspection. The fence will need to be maintained until it is removed.	CostaR	08/16/2017
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	CostaR	08/16/2017
An extended corrective action date was provided to accommodate a fall seeding.	CostaR	08/16/2017
