Corrective Action: _____ Date _____

Overall Final Reclamation _____ Well Release on Active Location ☐ Multi-Well Location ☐

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Silt Fences	Pass					Maintenance needed along a few portions
Tracking Pad	Pass					
Ditches	Pass					Unconsolidated soil needs to be stabilized- Pic 13
Rip Rap	In Process					

Comment:

1) Did not observe any sediment or erosion control BMPs along the eastern and northeastern perimeter of the location to control and manage for stormwater runoff from location. Rill erosion was observed along a portion of the eastern location. Operator shall install required BMPs by 9/25/17. 2) Operator will need to manage and control run-on onto location along the southeastern location. Adjacent lands could appear to contribute to potential run-on onto location because of the lack of vegetation. 3) Rip-rap appears to be used as both an erosion and sediment control BMP along the northern location discharge point. Rip-rap alone may not be a sufficient sediment control BMP, especially as sediment builds up within the rip-rap.

Corrective Action:

Install or repair required BMPs per Rule 1002.f.

Date: 09/25/2017

Pits: ☐ NO SURFACE INDICATION OF PIT
