General Comment:

This is a follow-up final reclamation and 2017 Flow line NTO inspection, to inspection doc. #682502184, and to Resolution Doc. #401327549. Any corrective actions from previous inspections that have not been addressed are still applicable.

WEEDS

Comment:

Inspection doc. #682502184 required operator to manage Canada Thistle on the location. Resolution Doc. #401327549 states "weeds have been taken care of". Though some weed management does appear to have occurred, Canada thistle remains prevalent throughout the location with some individuals already having seeded out for the year. See attached photos. Weed management needs to be an ongoing process and monitored.

Corrective Action:

Manage noxious weeds on location and comply with Rule 603.f

Date: 08/28/2017

Comment: Meter sheds have been removed. Inspection Doc. #682502184 required operator to perform reclamation in accordance to COGCC 1000 series reclamation rules on access road and location. See inspection for additional details. This CA remains applicable.

Corrective Action: _____ Date **11/15/2017**

Reclaim access road and location in accordance to COGCC 1000 series reclamation requirements and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. The prime time frame for a spring seeding has passed, to take advantage of a fall seeding, revegetation activities shall be complete no later than 11/15/2017.
