

Photo 1: View of the project area from the northwestern corner facing center.

Photo 2: View of the western portion of the project area from the northwestern corner facing southward. Revegetation is largely comprised of western wheatgrass (*Pascopyrum smithii*) and smooth brome (*Bromus inermis*).

Photo 3: View of culvert on the well pad. Approx. 20 Canada thistles are growing at outlet.

Photo 4: View of yellow toadflax (*Linaria vulgaris*) in the northern portion of the project area. Two populations in the northern portion of the project area, totaling approximately 1500 plants persist.
