**General Comment:**

This is a follow-up Final Reclamation and Stormwater inspection to FIR Document #682401359. Well was plugged 5/2012. Any corrective actions from previous inspections that have not been addressed are still applicable. If corrective actions from the previous inspection report remain unresolved, corrective action dates will remain unchanged.

Comment:  Concrete slab and vault remain at tank battery location. Please refer to attached photos from Field Inspection Report Document #682401359.

Corrective Action: \_\_\_\_\_ Date **03/31/2017**

Well location meets Rule 1004 standards; however, the Operator has failed to remove a concrete slab and vault from tank battery location. Any disturbance created during the removal of these items, shall comply with Rule 1004 standards. See COGCC comments for additional compliance information regarding revegetation. Corrective actions from the previous inspection were not resolved; therefore, the corrective action date on this inspection will remain the same from the previous inspection.

User

Date

Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.
