Comment:

	Germination was observed throughout most of the disturbance area; however, germination is not uniform throughout the entire disturbance area and bare patches with no germination were observed. The eastern and southeastern disturbance areas appeared to have sufficient germination establishment (refer to Inspection Photos 1&7). Other disturbance areas had little to no germination establishment (refer to Photos 4&5) or were dominated by weedy, annual vegetation with little germination establishment (refer to Inspection Photo 6). The access road to the entrance of the disturbance area that was not fenced does not have sufficient germination as well. Refer to the attached inspection photos for more details.	
Corrective Action:	Pursuant to Order 1V-632, the Operator must comply with all sections of the AOC and specifically regarding the revegetation issue documented on this inspection within Section 2, Paragraph 2(c) of the AOC.	Date <b>09/15/2017</b>
