Nature of complaint (sound, noise, etc): Odor, Tank Labeling, Safety Concerns

Inspection details:

Two COGCC inspectors visited the location on Monday September 18, 2017 late morning through early afternoon. No odors were observed off of the location, wind conditions varied between calm and slight breeze. Inspection of the methanol tanks found that one tank was owned by DCP and the other needed to have a capacity labeling added. Contents and NFPA stickers were displayed. A request for the operator to supply a spill response plan to the COGCC or install secondary containment for the methanol tank was included in the

Field inspector contacted the Firestone police department and requested additional patrols to prevent public trespass on the location. The precaution was taken due to the safety sensitive proximity of the battery to a middle school. Diagram attached.
