| 1         | Drilling/Completion Operations | The first well on this pad, Gregory 0780 1-9H, API No. 05-057-06539, was logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All subsequent wells drilled on the pad will have a cement bond log with gamma-ray run on the production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for wells without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify Gregory 0780 1-9H, API No. 05-057-06539 in which open-hole logs were run. |
