To: "rick.allison@state.co.us" <rick.allison@state.co.us>, Troy Swain <tswain@co.weld.co.us>

Cc: "Don W. Barbula" <DBarbula@bayswater.us>

Apologies for the multiple emails, but I have an updated Lat/Long for you:

40.32'28.8"

104.39'17.5"

The landowner has also been notified.

Please let me know if you have any questions.

Thanks!
Meagan

Hi Rick & Troy—

Wanted to let you know about a release on the Meyring 13-27 flowline. We are speculating that the rupture in the line was caused by the corn cutting equipment, or may have provided a way to get to surface when it went over the flowline. The flowline was closed on both ends, and has a capacity of 8 bbls in the line. It is estimated that 2-3 bbls was released from the line and traveled down a few of the cord row trenches. Berms are being built on either side of the traveled oil, which has now soaked into the shallow surface ground. Booms and absorbent pads will be placed down the corn trenches until line locates can be called in.

Please see the attached Initial Form 19. We will submit a supplemental on Monday.

Thanks

Meagan
