General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Environmental	Originally submitted 1/4/2013 but not processed by COGCC. See attachment for original F-4 and lab data. Closure data for five blowdown pits (No F-15 required) shows sample results compliant with Table 910-1. No remediation required. Pits were at 103-08376, 103-08422, 103-08515 (pit#101749), 103-08525 and 103-08516. Based on the information presented, it appears that no further action is necessary at this time and the COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be impacted, then further investigation and/or remediation activities may be required. In addition, the surface area disturbed by the remediation activity shall be reclaimed in accordance with the 1000 Series Reclamation Rules.	09/27/2017
