The surface locations of the above referenced proposed wells have been staked at a distance less than the required 150 feet from a surface property line per Colorado Oil & Gas Conservation Commission (COGCC) Rule 603.a.(2), which states that a well shall be located not less than 150 feet from a surface property line, and are being permitted as exception locations. Extraction's proposed wells are located between 5 and 134 feet from the property line to the north. These wells are being proposed less than 150 feet from a property line due to an agreed upon location with the surface owner in the Surface Damage Agreement, who is also the encroached upon surface owner. Extraction has obtained written permission from the offset surface owner by way of signed waiver.

Extraction respectfully requests the COGCC to review the enclosed information and approve the requested exception location request and Applications for Permit to Drill for these wells.

Respectfully,
