	<p>This location does not meet reclamation requirements; insufficient vegetative cover. Sundry Doc. #401338076 dated 7/11/2017 stated surface owner had reseeded the location with a "Sudax Grass" towards the end of June 2017. Location remains predominantly unvegetated; uniform establishment has not been achieved. Though inspector is unsure as to when it was planted, the adjacent crop fields with similar sudax grass shows vegetative growth exceeding heights of 7 feet in areas. Plant growth w/in the disturbance appears stunted and to have chlorosis. Unable to find evidence that operator has adequately performed reclamation. Provide soil sampling to indicate soil is sufficient for crop growth. This location is being considered for enforcement.</p>	
Corrective Action:	<p>Perform reclamation in accordance to COGCC 1000 series reclamation requirements including, but not limited to, compaction alleviation and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels at well and battery locations. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.</p>	Date 06/30/2017
