Comment: Inspection #682502409 documented that crop vegetation growth over the well and battery locations is stunted when compared to the adjacent areas, and that this is likely due to compaction concerns. The inspection required operator to perform additional reclamation. Upon follow-up, unable to find evidence that additional reclamation activities per the corrective actions have been performed. Original corrective action and corrective action date remains applicable.

Inspector Name: Trujillo, Aaron

Corrective Action:	Perform additional reclamation on in accordance to COGCC 1000 series reclamation requirements and standards. All additional reclamation activities shall completed no later than September 15th, 2017	Date	09/15/2017
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

**COGCC Comments**

Comment	User	Date
Based on the inspector's experience, the likely cause of stunted growth occurs when root barriers form from compacted soils, which diminish growth potential.	trujilloam	10/11/2017
Records indicate well was PA'd 12/17/2014. All reclamation work should have been conducted by 3/17/2015. This location has been out of compliance for over 2 years.	trujilloam	10/11/2017
