Comment:

Inspection #682502407 documented well was PA 5/25/2017 (per form 6 #401314861). This inspection noted that the meter shed north of the well still remains, that Reclamation rule 1004.a requires that all equipment be removed within 3 months of plugging the associated facility and that the equipment will need to be removed by 8/25/2017. Additional reclamation activities appear to have been conducted at the well, access road and battery location, however meter shed has not been removed per 1004.a. Removal of meter shed will now be required.

Corrective Action: **Remove meter shed, and related equipment in accordance 1004.a and reclaim.**

Date **11/11/2017**

Overall Final Reclamation

Well Release on Active Location ☐

Multi-Well Location ☐

COGCC Comments

Comment	User	Date
Note to operator: There area areas of the access road where the remain evident, see photo #4. This suggests that the required compaction alleviation may not have been performed per reclamation rules; It appears the road had only been inter-seeded and crimped. Reclamation will not pass until the required compaction alleviation, or cross-ripping, to a depth of 18 inches (per 1003.c) of the access road and well/battery locations have been performed.	trujilloam	10/11/2017
