Corrective Action: Manage noxious weeds on location and comply with Rule 603.f Date: 08/28/2017

Response: CA COMPLETED Date of Completion: 08/23/2017

Operator Comment: Weeds have been mowed throughout location and will continue to be monitored and managed until final reclamation can be completed.

COGCC Decision: Approved pending re-inspection

"Approved pending re-inspection" of the FIR resolution acknowledges that the Oil and Gas Conservation

COGCC Representative: Commission has received the notice. It is not an acknowledgement that the corrective action has been passed. A field inspection will be conducted to evaluate compliance with COGCC standards.

2  CA# 93125

Corrective Action: Reclaim access road and location in accordance to COGCC 1000 series reclamation requirements and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. The prime time frame for a spring seeding has passed, to take advantage of a fall seeding, revegetation activities shall be complete no later than 11/15/2017.

Date: 11/15/2017

Response: FACTUAL REVIEW REQUEST

Basis for Review: Corrective action dates are not attainable

Operator Comment: This location is an active remediation site, project number 3281. Final reclamation cannot take place until the remediation project has been completed.

COGCC Decision: **Not Approved**

COGCC Representative: COGCC records indicate that the remediation project number cited by the operator (#3281) is not associated with the CJ Schmidt well. Records shows project #3281 is associated with the HSR-Vasser well, API # 123-15484. Operator will need to contact environmental to update records so that the remediation project is associated with the correct well, API and location.

COGCC Supervisor: COGCC Decision "Not Approved". After interaction with the environmental group, it was determined that the access road can remain until closure of the remediation project. However, reclamation will be required throughout the remainder of the location. Areas around the piezometers (monitoring wells) will need revegetating for site stabilization. Upon closure of the remediation project, reclamation of the access road will commence immediately.

OPERATOR COMMENT AND SUBMITTAL

Comment: Weeds have been mowed throughout location and will continue to be monitored and managed until final reclamation can be completed.
This location is an active remediation site, project number 3281. Final reclamation cannot take place until the remediation project has been completed.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
