

well file

July 29, 1959

Mrs. Harry C. Schleicher
100 East-2nd Avenue,
Cheyenne, Wyoming

Dear Mrs. Schleicher:

As you will recall in March 1959 we contacted you concerning the disposition of the # 1 Himes well in Section 10, Township 2N, Range 69 W. This request was promptly answered, and on April 21, 1959 we received the requested log on the well from Mr. Franks. In his cover letter he indicated that the well may have been plugged or that you may plug it in the near future.

In the above regard, please be advised that if the well is to be plugged, intention to do so, showing the method, must be submitted to and approved by this office prior to plugging, and a plugging report must be submitted after the well is plugged.

Will you please advise of your plans for future disposition. You will note that a copy of this letter is being sent to Mr. Franks with the thought that he might assist you.

Yours very truly,
Oil and Gas Conservation Commission

W.R. Smith, Senior Engineer
