Comment: [Inspection #682501926 documented erosion concern, trash debris remaining and that the location is predominantly unvegetated, bare and exposed soil. This inspection required operator to reclaim the location. Unable to find evidence that the required reclamation activities have been conducted per the corrective actions. Original corrective action and corrective action date remains in place.](#)

Corrective Action:	Remove and properly dispose of trash debris. Establish vegetation with total perennial, noninvasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the landowner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 5/31/2017.	Date	05/31/2017
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

**COGCC Comments**

Comment	User	Date
Records indicate well was PA'd 8/26/2010. COGCC 1004.a reclamation rule requires that reclamation activities to have been completed within twelve (12) months on non cropland after plugging. All reclamation activities should have been conducted by 8/26/2011.	trujilloam	10/19/2017
Note to operator: Inspector had been informed that Mr. Bazile is no longer with the company. COGCC records still show Mr. Bazile as the principal agent for DJ resources. Operator will need to contact COGCC' Financial Assurance to update the required information.	trujilloam	10/19/2017
