TRANSECT RESULTS OF REFERENCE AREA% \_\_\_\_\_

TOTAL % OF DESIRABLE VEGETATION COVER \_\_\_\_\_

VEGETATIVE COVER \_\_\_\_\_

Comment: The site does not comply with the reclamation requirements. The vegetation has not reestablished at the location and there is predominately undesirable weeds and areas with no vegetation growth. There are areas where the soils appear to be compacted. It does not appear that any reclamation efforts have been performed since the previous inspection. See Attached Photos

Corrective Action:	Comply with 1004 Rules. Reclaim the location as required. Decompact soils by cross ripping to a minimum depth of 18 inches. Reseed areas of disturbance and stabilize the soils with a certified weed free mulch or equivalent method until vegetation establishes.	Date	12/01/2017
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

**COGCC Comments**

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	CostaR	10/13/2017
