### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

While hydro-vacuuming to locate untraceable underground lines, petroleum hydrocarbon impacted soil was encountered. A hole in the water dumphine was discovered while excavating the impacted soil. The volume of the release is unknown. The well was shut in and the petroleum hydrocarbon impacted soil was excavated.

Groundwater monitoring wells MW01 through MW09 are sampled on a quarterly basis and submitted for analysis of benzene, toluene, ethylbenzene, and total xylenes (BTEX) by United States Environmental Protection Agency (USEPA) Method 8260C. The monitoring well locations are depicted on Figure 1. A Groundwater Elevation Contour Map generated using the May 2017 survey data is provided as Figure 2. The groundwater analytical results are summarized in Table 1. The laboratory analytical report for the May/June 2017 groundwater monitoring event is attached.

Groundwater monitoring will continue on a quarterly basis until a No Further Action status request is warranted.
