Per Rule 1002.b.(1), topsoil segregation shall be performed to the extent practicable to a depth of six (6) feet or bedrock, whichever is shallower.

Does not appear the Operator has salvaged a sufficient amount of topsoil. The adjacent location to the south (Hergert well pad- Location ID 440396) has approximately the same disturbance area but has significantly more topsoil salvaged than the Launer location. Refer to the attached inspection photos for more detail.

Corrective Action

Operator shall provide the following documentation: 1) How did the Operator determine topsoil segregation depth from lower soil horizons, and 2) How much topsoil was salvaged and stored at location.

In addition, the Operator shall salvage and store topsoil per Rule 1002.b.(1).
