The surface locations of the above referenced proposed wells have been staked outside of the Colorado Oil & Gas Conservation Commission (COGCC) Rule 318A.a. Greater Wattenberg Area Drilling Window and are being permitted as exception locations. Extraction's southeastern most proposed well is located approximately 185 feet west of the SWSW Drilling Window. These wells are being proposed outside of the Drilling Window due to an agreed upon location in the Surface Damage Agreement with the surface owner. Extraction has obtained written permission from the surface owner by way of signed waiver.

Extraction respectfully requests the COGCC to review the enclosed information and approve the requested exception location request and Applications for Permit to Drill for these wells.

Respectfully,
