VEGETATIVE COVER _____

Comment: Inspection #682501446 failed reclamation due to insufficient vegetation cover and required operator to perform additional re-vegetation activities. Operator has not submitted any documents to inspector indicating work per the corrective action has been completed; This location remains predominantly bare and exposed soil. Unable to find evidence that additional reclamation activities have been conducted. Original corrective action and corrective action date remains applicable.

Corrective Action:	Perform reclamation in accordance to COGCC 1000 series rules and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 3/15/2017.	Date	03/15/2017
