

**Photo 1. View from the northern corner of the well pad facing center.**

**Photo 2. View of the northwestern portion of the well pad from the northern corner facing southwestward. Revegetation is progressing (although sparse on cut-slope) with grasses such as western wheatgrass (*Pascopyrum smithii*) and Indian ricegrass (*Achnatherum hymenoides*).**

**Photo 3. View of the northern portion of the project area from the northern corner facing eastward.**

**Photo 4. View of silt trap in the northeastern portion of the project area. Evidence of overflow and erosion downstream indicates silt trap needs maintenance.**

**Photo 5. View of area downstream of silt trap where sediment is being carried offsite and erosion is occurring.**
