**Photo 1:** Photo taken from the west end of the location, facing east. Previous inspections documented that inadequate stormwater and sediment control BMPs have been installed with good engineering practices, and required operator to install or repair required BMPs per rule 1002.f. Operator may have implemented surface roughening, however this is not clear. If surface roughening had been installed, BMP would be insufficient/inadequate as surface roughening is a temporary control that should be used in conjunction with other BMPs. Photo shows no additional stormwater and sediment control BMPs appear to have been implemented on the location.
