Comment:

Final land use might be housing development as housing development construction activities are in-process nearby. Portions of the northern access road appear to be within the new housing development. Refer to the attached inspection photos for more detail.

Inspection notes copied from the previous Field Inspection Report (Document #673504517) that still apply: The access road and location have not been reclaimed. There is gravel, pieces of lumber and pipe, and various debris which have not been removed. The location has not been recontoured and the soil is heavily compacted.
