TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment:

Inspection #682502451 documented that the location is not progressing towards reclamation standards and required operator to conduct additional reclamation activities. Operator submitted resolution doc #401423256 indicating CA has been completed.

Additional reclamation activities appear to have been conducted; location appears to have been reseeded and crimped with straw for stabilization. This satisfies the corrective action. Reclamation in-process. Continue to monitor and manage the location and perform reclamation as needed. Once location has met COGCC 1000 series reclamation standards, submit a form 4 and a follow-up inspection will be scheduled.
