New Drilling Company
Patterson Building
Denver, Colorado

Gentlemen:

We have been requested to give you a waiver for location of a well in the NW NE NW Section 20, Township 8 North, Range 54 West, as an exception to the recently adopted Statewide Rule requiring wells to be drilled in the center of the 40 acres.

As offset operator to the North in Section 17, Township 8 North, Range 54 West, we waive objections to the location of your well provided that in no event should said well be closer than 330 feet from our line.

This waiver is given due to the fact that all of the other wells in this North Johnson-Hill Field are located on a 20-acre pattern with staggered 10-acre locations and this is in line with locations of other wells in this field.

Yours very truly,

(Signed) GEORGE W. SELINGER
