Ben,

Per the Mamm Creek field rules, a CBL delay request needs to be filed with the COGCC. I attached a copy of the text I've often used below, and then they also need the one page temp log. make sure. The rig will email in the 72 hour bradenhead monitoring summary as soon as we get that far past the cement job.

Thanks Ben. Vanguard van defer running the bond log on this well. Please keep a close eye on the bradenhead on this one. That is an odd temp drop around 5000 feet.
