December 3, 1965

Mr. Pete Couch
Bander & Couch
508 Petroleum Building
Abilene, Texas

Dear Pete:

After our telephone conversation of December 2, concerning the combining of Dude and Key fields, we had a chance to look at the electric logs of those wells 1 and 2, west-east line in Sections 25 and 30.

Even though there is a difference in the producing benches of the "J" sand, there is enough proximity of the wells to consider it all one field.

We have dropped the name Dude and will consider all the wells in Section 30, Township 8 North, Range 53 West, as Key field.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION
OF THE STATE OF COLORADO

F. J. Piro, Senior Petroleum Engr.
