(DETAILS OF WORK)

We proposed to plug and abandoned this well as production has declined to two barrels of oil per day and ninty barrels water per day, and is operating below the economic limit. As much 5-1/2" casing as possible will be pulled. The perforations will be covered with gravel and a 15 sack cement plug will be placed above the perforations. A 15 sack plug will also be placed at the bottom of the surface pipe and a 10 sack plug will be placed at the surface.
